# SANDIP SAHU

**Full Stack Developer | 10+ Years of Experience**

**New Delhi | sandeepuim@gmail.com | +91-9278916760 | linkedin**

---

## PROFESSIONAL SUMMARY

- 10+ years of experience in building Web & Enterprise Applications with a strong focus on Angular, Reacts, Node.js, and PHP.
- Extensive experience in building scalable enterprise applications such as CRM, ERP, LMS,
- CMS, and high-traffic platforms. Skilled in end-to-end development—from requirement analysis and architecture design to frontend implementation, backend APIs, database optimization, and cloud deployment.
- Proven ability to work on legacy systems as well as modern microservice-based architectures, with a strong focus on performance, security, scalability, and clean code practices.

---

## TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, Angular (4–18), TypeScript, JavaScript (ES6+), jQuery, HTML5, Bootstrap, Ajax
- **Backend:** Node.js, Express.js, NestJS, Python, Core PHP, Laravel, Yii, CodeIgniter,
- **CMS:** WordPress (Custom Themes & Plugins), CMS-based Solutions
- **Database:** MySQL, PostgreSQL, Query Optimization, Schema Design
- **Cloud & DevOps:** AWS (EC2, S3, RDS, IAM), Docker, CI/CD, PM2, AWS Lambda
- **Architecture:** Monolithic, Modular Monolith, Microservices, Event-Driven
- **Tools:** Git, Postman, Swagger, JIRA, Agile/Scrum

---

## PROFESSIONAL EXPERIENCE

**Full Stack Developer, Digital Slick India Pvt. Ltd. | Nov 2025 – June (Contract)**

• Leading development of a modern **React.js, TypeScript and Next.js–based frontend application** with focus on performance, SEO, and scalability.
• Building and maintaining **Node.js, ExpressJS backend services** to support frontend workflows and business logic.
• Integrated **third-party APIs** including **Alpaca (broker/trading APIs)** and **SMS gateway services** for real-time notifications and transactional messaging.
• Implemented secure authentication, authorization, and API validation mechanisms.
• Worked on frontend state management, API consumption, and optimized client-side rendering.
• Collaborating with product and backend teams to design scalable APIs and ensure smooth frontend–backend integration.

• Participating in code reviews, architecture discussions, and improving overall code quality and maintainability.

**Senior Software Engineer, Mytech Global Pvt. Ltd. | Aug 2025 – Nov 2025**
**Client Epam Systems**
• Developed a Medical Directory platform using WordPress with complete Admin and Frontend functionality.
• Created custom WordPress themes and plugins based on project requirements.
• Implemented user authentication and bookmark/favorites features for directory listings.
• Built an advanced search and filtering system based on location, category, and other parameters.
• Customized WordPress APIs and integrated dynamic frontend components.
• Optimized performance and improved usability for directory listing pages.

**Full Stack Developer, Xoom Web Development Pvt. Ltd. | Jan 2025 – Aug 2025**
• Developed scalable web applications using **Angular,Next.js,TypeScript,Node.js,Express.js, and PostgreSQL**.
• Designed and implemented **secure RESTful APIs** with role-based access control.
• Built **Angular SPAs** and ensured seamless frontend–backend integration.
• Optimized backend performance through **query tuning, caching, and API refactoring**.
• Assisted in setting up **CI/CD pipelines**, Git workflows, and deployment processes.
• Contributed to architectural decisions and conducted peer code reviews.

**Software Engineer, Ascent Cyber Solutions Pvt. Ltd. | Dec 2021 – Jun 2024**
• Worked as a Full Stack Developer on Angular,TypeScript,Next.js, Node.js, PHP, and WordPress-based systems.
• Led a 3-member development team, handled task planning and code reviews for Angular and Node.js microservices-based applications.
• Developed REST APIs and integrated them with CMS platforms and third-party services.
• Improved website and API performance by up to 3x through code optimization and caching.
• Built reusable WordPress plugins, SEO-optimized themes, and custom backend modules.
• Implemented CI/CD pipelines and followed Agile development practices.

**Software Developer, Softlogique IT Solutions Pvt Ltd. | Oct 2019 – Aug 2021**
• Designed and developed backend systems for CRM and LMS platforms using PHP and Laravel.
• Created optimized database schemas and handled complex business logic.
• Integrated frontend components with backend services and REST APIs.
• Managed testing, deployment, bug fixing, and production support.
• Collaborated directly with clients to gather requirements and deliver solutions.

**Software Developer, Arun Verma Design Studio | Mar 2013 - Jul 2018**
• Developed and maintained web applications using Core PHP, Yii, and CodeIgniter.
• Built CMS-driven websites and custom admin panels.
• Created reusable UI components and backend modules.

• Fixed critical production issues and improved application stability.
• Gained strong fundamentals in MVC architecture and backend best practices.

---

**PROJECT SUMMARY**

**Investur Hub (Private Enterprise Application)**
**Role:** Senior Full Stack Developer
**Tech Stack:** React.js, Next.js, Node.js, Express.js, REST APIs, PostgreSQL, GitHub Actions, CI/CD, AWS

- Developed a scalable investment management platform using Node.js and Express.js to build secure and high-performance RESTful APIs.
- Built a responsive and SEO-friendly frontend using React.js and Next.js, leveraging server-side rendering (SSR) for improved performance and SEO.
- Designed and integrated RESTful APIs for user management, investment workflows, dashboards, and reporting.
- Designed and optimized PostgreSQL database schemas and managed databases using pgAdmin to ensure efficient data storage and high-performance queries.
- Implemented secure authentication and role-based access control (RBAC) using JWT and middleware.
- Optimized frontend-backend communication, improving application performance and reducing API response times.
- Configured automated deployments using GitHub Actions and CI/CD pipelines for seamless releases.
- Collaborated with cross-functional teams to deliver features, resolve production issues, and maintain application stability.

Project: Private enterprise application (accessible via VPN only)

**Utazoo CRM & Website – https://www.utazzo.com/**
**Role:** Senior Full Stack Developer
**Tech Stack:** Angular, Node.js, Express.js, REST APIs, MySQL, AWS (EC2, S3), PM2, CI/CD, GitHub, Postman
• Designed and developed a scalable, modular monolithic CRM application using Node.js and Express.js to handle business logic and API orchestration.
• Built a dynamic Angular TypeScript -based frontend consuming RESTful APIs for lead management, user profiles, bookings, and customer workflows.
• Designed and optimized MySQL database schemas to support high-volume transactional data.
• Implemented secure authentication and role-based access control using JWT and middleware.
• Integrated third-party Flight and Hotel APIs to fetch real-time availability, pricing,

and booking information.
• Optimized frontend–backend communication, reduced API response time, and improved overall application performance and usability.
• Deployed and managed the application on AWS (EC2, S3) using PM2 and CI/CD pipelines.

**RealmTalks – https://play.google.com/store/apps/details?id=com.rayzinfo.realmtalks**
**Role:** Senior Full Stack Developer
**Tech Stack:** Node.js, Angular, PostgreSQL, REST APIs, Microservices Architecture, RabbitMQ, Docker, Argo CD (CI/CD), GitHub, Postman, MediaSoup, WebRTC
• Built and scaled RealMTalks, a social media platform similar to Instagram, using a microservices-based architecture.
• Designed and implemented independent microservices for posts, chat, reels, stories, authentication, and wallet management.
• Developed RESTful APIs using Node.js and PostgreSQL with optimized schema design and connection pooling.
• Implemented event-driven communication between services using RabbitMQ.
• Handled asynchronous and parallel processing using async/await, Promise.all, and worker threads for high-performance execution.
• Applied rate-limiting, Node.js clustering, and load management techniques to support high concurrent traffic.
• Built real-time chat and media features including:
  – Live video streaming supporting up to 10 concurrent users on an 8-core server
  – Group video calling using MediaSoup and WebRTC
• Containerized services using Docker and managed automated deployments via Argo CD CI/CD pipelines.

**Embibe Exam Platform** – https://www.embibe.com/exams/
**Role:** Senior Full Stack / Backend Developer
**Tech Stack:** Azure, Docker, Node.js, WordPress, HTML, CSS, Bootstrap, MySQL Server
• Worked on backend services and platform optimization for Embibe's exam preparation ecosystem.
• Developed and enhanced backend components using Node.js and WordPress.
• Improved application performance and stability through code optimization and infrastructure tuning.
• Implemented CI/CD pipelines using Docker to streamline deployments.
• Collaborated with cross-functional teams including QA, DevOps, and product stakeholders to deliver scalable and reliable features.
• Supported a high-traffic EdTech platform with large-scale user access.

**Neon Education LMS**
**Role:** Backend Developer (Laravel)

**Tech Stack:** Laravel, PHP, MySQL, VPS Hosting, HTML, CSS, Bootstrap
• Designed and implemented the backend architecture for a Learning Management System (LMS) using Laravel.
• Developed secure authentication and authorization mechanisms.
• Designed database schemas and implemented backend logic for users, courses, and content.
• Worked closely with stakeholders during requirement gathering and solution design.
• Wrote clean, maintainable, and efficient code following best practices.
• Managed testing, deployment, and production support on VPS environments.

**Project** : **EXL Excellence Quotient -** http://www.exlanalytics.in/eq
**Role:** Backend Developer (PHP / Yii)
**Tech Stack:** Yii Framework, PHP, MySQL, AWS (Apache), HTML, CSS, Bootstrap
• Participated in application architecture design and creation of reusable design templates.
• Developed and maintained backend modules using Yii framework.
• Optimized MySQL queries and improved overall application performance.
• Diagnosed and resolved PHP-related production issues in a timely manner.
• Collaborated with cross-functional teams to enhance system stability and scalability.
• Supported deployment and maintenance on AWS-hosted infrastructure.

### Additional PHP & CMS Projects

**Role:** Senior PHP / CMS Developer
**Technologies:** PHP, Laravel, WordPress, MySQL, HTML, CSS
• Delivered multiple production-grade web platforms using Laravel, Core PHP, and WordPress across domains including education, healthcare, HRMS, news portals, and non-profit.
• Designed backend logic, database schemas, and admin panels for content and user management.
• Built custom WordPress themes and plugins tailored to business requirements.
• Implemented secure forms, authentication, and data handling mechanisms.
• Optimized database queries and improved application performance and stability.
• Handled end-to-end development including requirement analysis, development, testing, deployment, and post-launch support.

---

## Education

- **MCA**, United Institute of Technology Prayagraj – 2008
- **PGDCA**, Board of Technical Education, Lucknow – 2005
